Investment update - October

Following our latest Investment Committee meeting, changes were made to the Balanced strategy during October's quarterly rebalance. The Henderson Index Linked Bond fund was sold, with some proceeds being reinvested into the Threadneedle Sterling Short Dated Corporate Bond fund, with the balance being retained as cash. The Henderson fund disposal represents a continuation of our current policy to reduce longer duration UK index-linked bond exposure to minimise duration risk within our strategies. Our Investment Committee felt that it was still too soon to be increasing equity risk, which continues to target a 40% weighting within the Balanced strategy, given we are about to enter uncharted waters; the replacement of a decade's worth of crisis monetary policies is likely to be quite troublesome. A change was made to the underlying UK equity income asset allocation, with the Henderson UK Equity Income & Growth fund being sold and proceeds being invested into the newly added Franklin UK Equity Income fund, to increase exposure to international earnings within the UK fund allocation.

Bordier UK Managed Portfolio Service

Our Bordier UK Managed Portfolio Service (BMPS) has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service invests actively in collective investment funds, which helps to ensure that investors benefit from a diversified spread of investments across a wide range of different asset classes, not just in the UK but in overseas markets as well.

There are five investment strategies for you to choose from. Each has its own risk profile and all of them are actively managed by us to ensure that we meet your investment goals. You can choose an income option in all of our risk strategies, which means that you could benefit from regular income from your investments as well as potential long-term capital growth.

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

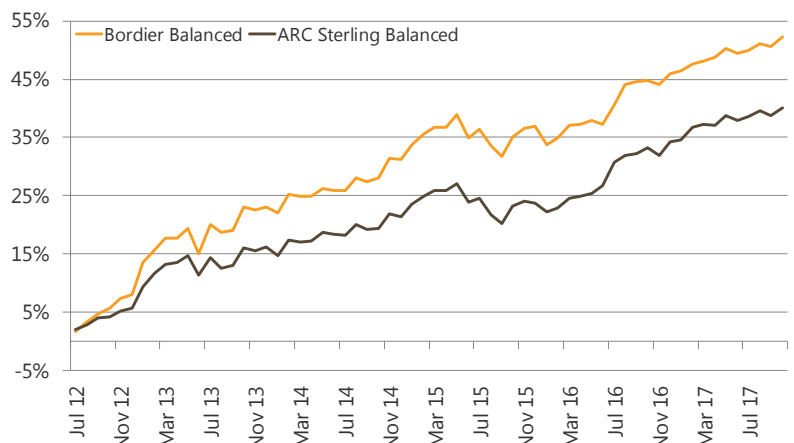

Risk category

The strategy is managed with a medium attitude towards risk with a maximum target of 60% invested in global equity markets at any given time.
