Investment update - December

No changes were made to the underlying investments during the month of December meaning the Balanced strategy ended the year as it started; with a 40% equity target. Despite our considered approach to global markets throughout 2017, we are mindful that economic growth has improved across the board with continued stimulus from low interest rates and asset buying programmes supporting the upturn in growth. Our Investment Committee's consensus that now does not seem the right time for excess risk-taking remains firm, however it is acknowledged that some economic headwinds have dissipated sufficiently to a level where perhaps a moderate (and well overdue) market setback could create an opportunity to tilt the strategy's risk exposure back towards a neutral position. Whilst we await a window of opportunity from a sufficient market correction, we continue to assess positions within the alternatives sector with a view to move away from any investments that are more likely to suffer to keep pace with a rising inflationary environment. Any changes will be outlined in following factsheets.

Balanced Strategy

Bordier UK Managed Portfolio Service

Our Bordier UK Managed Portfolio Service (BMPS) has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service invests actively in collective investment funds, which helps to ensure that investors benefit from a diversified spread of investments across a wide range of different asset classes, not just in the UK but in overseas markets as well.

There are five investment strategies for you to choose from. Each has its own risk profile and all of them are actively managed by us to ensure that we meet your investment goals. You can choose an income option in all of our risk strategies, which means that you could benefit from regular income from your investments as well as potential long-term capital growth.

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk category

The strategy is managed with a medium attitude towards risk with a maximum target of 60% invested in global equity markets at any given time.
