**Investment update - June**

After a solid start to the year, we remain comfortable with the underlying holdings within the Adventurous strategy as leading indicators during June suggest global economic growth may now be past peak cycle. Global trade tensions and a higher oil have caused a reassessment of future growth projections and have introduced new risk to the economic outlook. As a result, our Investment Committee decided to maintain equity exposure at 86%, below our long term neutral levels, with a continued bias towards overseas markets. Overseas markets remain favoured despite the pace of eurozone and Japanese economic recoveries having faded in recent months as stimulus continues in these regions. Meanwhile, the US economy has the most short-term momentum, boosted by tax reductions and improved consumer confidence and corporate profitability. Our Investment Committee remain happy to maintain our low duration fixed interest positioning, whilst policy adjustments and reactions to rising inflation and wage growth play out. Our alternative investment funds are likely to play an increasingly important role going forward, providing diversification from traditional asset classes, whilst our Investment Committee is also looking at diversifying our fund manager risk dependent on platform availability.

**Platform Managed Portfolio Service**

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous and is available on the following platforms: Ascentric, Aviva, FundsNetwork, Fusion, James Hay, Novia, Nucleus, Praemium, Seven Investment Management, Standard Life, Transact and Zurich.

**Investment objective**

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

**Risk score**

Our strategies are constructed around five investment strategies, each with a differing commitment to equities via collective funds and other asset classes. The strategy is managed with a maximum target of 100% invested in equity markets at any given time and has been categorised as a Bordier UK risk profile 5. This strategy has received a Defaqto Risk Rating 7 - Medium To High Risk.
