**Investment update - August**

Following the moderate correction seen in the first quarter of 2018, global stockmarkets have generally recovered quite well, largely on the back of continued monetary stimulus and a tax-led injection to US corporate profitability. However, in recent weeks market confidence has waned as some new challenges to growth and financial stability have emerged. Emerging markets have seen a sharp reversal as trade worries and US policy begin to come to the fore. The US Federal Reserve had already noted that changes to trade policy could cause it to question the outlook and how it handles its own policy change – the concern being a prolonged drag on corporate earnings that could accumulate over a longer period. Closer to home, Brexit continues to influence markets with EU Chief Negotiator Michel Barnier's recent comments hinting at a Brexit deal strengthening the pound and in turn weighing heavily on the UK market. As such, our considered approach to markets has continued and equity exposure remains targeting 86% in the Adventurous strategy. Whilst exposure to equity markets remained below our strategic long term neutral levels during August, a change was made to the underlying composition of our alternatives sector; increasing our weighting to funds which target slightly greater returns over the medium term.

**Platform Managed Portfolio Service**

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous and is available on the following platforms: Ascentric, Aviva, FundsNetwork, Fusion, James Hay, Novia, Nucleus, Praemium, Seven Investment Management, Standard Life, Transact and Zurich.

**Investment objective**

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

**Risk score**

Our strategies are constructed around five investment strategies, each with a differing commitment to equities via collective funds and other asset classes. The strategy is managed with a maximum target of 100% invested in equity markets at any given time and has been categorised as a Bordier UK risk profile 5. This strategy has received a Defaqto Risk Rating 7 - Medium To High Risk.
