Investment update - August

Following the moderate correction seen in the first quarter of 2018, global stockmarkets have generally recovered quite well, largely on the back of continued monetary stimulus and a tax-led injection to US corporate profitability. However, in recent weeks market confidence has waned as some new challenges to growth and financial stability have emerged. Emerging markets have seen a sharp reversal as trade worries and US policy begin to come to the fore. The US Federal Reserve had already noted that changes to trade policy could cause it to question the outlook and how it handles its own policy change – the concern being a prolonged drag on corporate earnings that could accumulate over a longer period. Closer to home, Brexit continues to influence markets with EU Chief Negotiator Michel Barnier's recent comments hinting at a Brexit deal strengthening the pound and in turn weighing heavily on the UK market. As such, our considered approach to markets has continued and equity exposure remains targeting 33% in the RT4 strategy. There were no changes made to the RT4 strategy as we continue to maintain our neutral risk position relative to the Dynamic Planner risk boundaries.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia platform. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
