Investment update - October

October saw the return of volatility to markets, with some leading indices seeing daily swings of 2-3%. Trade war tensions between the US and China persist whilst uncertainties surrounding the outcome and impact of Brexit for both the UK and continental European economies remain. During the month we added the Vanguard US Government Bond Index fund to our fixed income exposure as our Investment Committee felt that at elevated yields, US government bonds offered an attractive income-producing, dollar-based investment. Furthermore, if more troubled market conditions materialised then it was felt that investors were more likely to retreat to the relative safety of government bonds and the US dollar. The strategy's equity exposure has been returned to a neutral position within our strategic stockmarket range through the addition of the Arbrook American Equity fund. As mentioned last month, this is not a signal that we have become more positive about the global economy and stockmarkets as a whole – it is more about the obscured opportunities specifically within the US stockmarket and our continued confidence in the US dollar. Our Investment Committee remain happy with the positioning of the strategy and feel that even if underlying conditions become more uncertain and challenging as we move towards the new year, opportunities should open-up for active managers to exploit.

Managed Portfolio Service

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service invests actively in collective investment funds, which helps to ensure that investors benefit from a diversified spread of investments across a wide range of different asset classes, not just in the UK but in overseas markets as well.

There are five investment strategies for you to choose from. Each has its own risk profile and all of them are actively managed by us to ensure that we meet your investment goals. You can choose an income option in all our risk strategies, which means that you could benefit from regular income from your investments as well as potential long-term capital growth.

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk category

The strategy is managed with a medium attitude towards risk with a maximum target of 60% invested in global equity markets at any given time and has received a Defaqto Risk Rating 4 - Low Risk.
