Investment update - October

October saw the return of volatility to markets, with some leading indices seeing daily swings of 2-3%. Trade war tensions between the US and China persist whilst uncertainties surrounding the outcome and impact of Brexit for both the UK and continental European economies remain. During the month we added the Vanguard US Government Bond Index fund to our fixed income exposure as our Investment Committee felt that at elevated yields, US government bonds offered an attractive income-producing, dollar-based investment. Furthermore, if more troubled market conditions materialised then it was felt that investors were more likely to retreat to the relative safety of government bonds and the US dollar. The strategy's equity exposure has been returned to a neutral position within our strategic stockmarket range through the addition of the AXA Framlington American Growth fund. As mentioned last month, this is not a signal that we have become more positive about the global economy and stockmarkets as a whole – it is more about the opportunities within the US stockmarket and our continued confidence in the US dollar. Our Investment Committee remain happy with the positioning of the strategy and feel that even if underlying conditions become more uncertain and challenging as we move towards the new year, opportunities should open-up for active managers to exploit.

Platform Managed Portfolio Service

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous and is available on the following platforms: Ascentric, Aviva, FundsNetwork, Fusion, James Hay, Novia, Nucleus, Praemium, Seven Investment Management, Standard Life, Transact and Zurich.

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk score

Our strategies are constructed around five investment strategies, each with a differing commitment to equities via collective funds and other asset classes. The strategy is managed with a maximum target of 100% invested in equity markets at any given time and has been categorised as a Bordier UK risk profile 5. This strategy has received a Defaqto Risk Rating 7 - Medium To High Risk.
