### Investment update - December

The final quarter of 2018 has seen a great deal of anxiety descend upon global stockmarkets, which have finally begun to reappraise and reprice risk. Markets have been buffeted in December by a broad range of uncertainties which continue to exist, including the oscillating mood on trade between the US and China, Brexit chaos, Italy's precarious financial situation and a potentially less accommodative monetary framework. During the month, the sale of the Vanguard US Government Bond Index fund was placed for the RT4 strategy. The initial purchase was made on a tactical basis to take advantage of short term 10-year US government bond yields that were trading close to 3.1%, a level last seen over seven years ago in the aftermath of the 2008 financial crisis. Yields subsequently and expectedly, fell to under 2.9% and our Investment Committee took the decision to lock in short-term gains for clients by selling the holding and retaining the proceeds as cash. Although investors may need to brace themselves for some choppy waters in the new year, as markets have a habit of overreacting to events on both the upside and downside, in our opinion some brighter longer-term investment opportunities for active managers to head for should appear on the horizon soon, so it is worth holding a steady course.

### Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia platform. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

### Investment objective

The objective is to assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

### Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
