Investment update - December

The final quarter of 2018 has seen a great deal of anxiety descend upon global stockmarkets, which have finally begun to reappraise and reprice risk. Even the mighty US stockmarket, which for much of the year had become increasingly out of step with the rest of the world, has finally buckled. This has contributed to the first annual decline in global markets, as measured in sterling terms by the MSCI World Index, since 2011. Global bond markets have also found the going pretty tough and depending on currency influences, 2018 will be recorded in the history books as a year when both extremes of the risk spectrum have fallen in value - a very rare event. Markets have been buffeted by a broad range of uncertainties, including the oscillating mood on trade between the US and China, Brexit chaos, Italy's precarious financial situation and a potentially less accommodative monetary framework that has been kind to virtually every asset class over the past decade. As such no changes were made to the RT7 strategy during the month. Although investors may need to brace themselves for some choppy waters in the new year, as markets have a habit of overreacting to events on both the upside and downside, in our opinion some brighter longer-term investment opportunities for active managers should appear on the horizon soon, so it is worth holding a steady course.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia platform. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
