Investment update - January

Stockmarkets saw a slight recovery in January, following the anxiety felt towards the end of 2018, on the back of Jerome Powell's clarified rhetoric that the US Federal Reserve would be more measured with the pace of policy change. Tighter policy conditions, however, could act as a potential headwind and see the level of global growth fade in 2019. The continued trade war between the US and China may also affect global growth expectations; although the recent truce is welcome, tensions are expected to resurface. Furthermore, Brexit and other global political uncertainties are likely to continue to influence market sentiment and major currencies. The impact of some form of Brexit solution coupled with the softening of US interest rates could see a squeeze in the GBP/USD exchange rate, with the dollar weakening and pound strengthening. As such, our Investment Committee deemed it prudent to introduce some currency hedges on our US equity exposure within the RT5 strategy during the month. Targeting a currency hedge of approximately a third of our US equity exposure, the JPM US Equity Income Fund was switched for the sterling hedged share class of the fund. Our Investment Committee continue to look for investment opportunities to exploit and remain happy with the positioning of the strategy, which produced a return of 3.48% in January.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
