**Investment update - March**

From an investment return perspective, the first quarter of 2019 has offered encouragement as global stockmarkets have regained their composure. This is due, in large, to the combined effect of productive trade talks between the US and China as well as the US Federal Reserve (Fed) seemingly taking a more measured stance to the pace of policy change. It is not just the Fed that has pressed the pause button on monetary policy, with many other central banks seemingly following suit. This owing to economic growth being revised downwards in almost all G20 economies on the back of a range of uncertainties, namely; heightened policy uncertainty, persistent trade tensions, concerns over China's economy, ongoing declines in business confidence and of course, Brexit. As such, no changes were made to the Balanced strategy in March, with the strategy's current positioning reflecting both the shorter-term uncertainty and potential longer-term opportunity. Whilst our equity exposure remains neutrally positioned, our current cash weighting means we have cash ready to deploy if and when an opportunity arises.

**Platform Managed Portfolio Service**

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous and is available on the following platforms: Ascentric, Aviva, FundsNetwork, Fusion, Hubwise, James Hay, Novia, Nucleus, Praemium, Seven Investment Management, Standard Life, Transact and Zurich.

**Investment objective**

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

**Risk score**

Our strategies are constructed around five investment strategies, each with a differing commitment to equities via collective funds and other asset classes. The strategy is managed with a maximum target of 60% invested in equity markets at any given time and has been categorised as a Bordier UK risk profile 3. This strategy has received a Defaqto Risk Rating 4 - Low Risk.
