Investment update - March

From an investment return perspective, the first quarter of 2019 has offered encouragement as global stockmarkets have regained their composure. This is due, in large, to the combined effect of productive trade talks between the US and China as well as the US Federal Reserve (Fed) seemingly taking a more measured stance to the pace of policy change. It is not just the Fed that has pressed the pause button on monetary policy, with many other central banks seemingly following suit. This owing to economic growth being revised downwards in almost all G20 economies on the back of a range of uncertainties, namely; heightened policy uncertainty, persistent trade tensions, concerns over China's economy, ongoing declines in business confidence and of course, Brexit. As such, no changes were made to the RT3 strategy in March, with the strategy's current positioning reflecting both the shorter-term uncertainty and potential longer-term opportunity. Whilst our equity exposure remains neutrally positioned, our current cash weighting means we have cash ready to deploy if and when an opportunity arises.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
