Investment update - May

The first four months of 2019 have seen portfolio values benefit from steadily rising equity markets, assisted by more accommodating monetary policy from central banks as well as the possibility of a trade deal between the US and China. Just six days into May, however, the US announced it would increase the tariff rate on \$200 billion worth of Chinese imports from 10% to 25%, and that it may also impose a 25% tariff on the \$300 billion worth of goods that remain. In retaliation, China raised tariffs on \$60 billion in US goods, further escalating trade tensions and resulting in May being the first negative month of performance seen across global markets this year. Closer to home, Theresa May announced her resignation as Prime Minister, creating further uncertainty surrounding the UK's political climate and Brexit. During the month, our Investment Committee changed the make-up of our underlying funds within the RT4 strategy's alternative investments sector. Our continued overweight position to the sector should be beneficial during times of global uncertainty, whilst the rest of the strategy remains positioned to take advantage of any longer-term market opportunities should they arise.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
