#### Investment update - May

The first four months of 2019 have seen portfolio values benefit from steadily rising equity markets, assisted by more accommodating monetary policy from central banks as well as the possibility of a trade deal between the US and China. Just six days into May, however, the US announced it would increase the tariff rate on \$200 billion worth of Chinese imports from 10% to 25%, and that it may also impose a 25% tariff on the \$300 billion worth of goods that remain. In retaliation, China raised tariffs on \$60 billion in US goods, further escalating trade tensions and resulting in May being the first negative month of performance seen across global markets this year. Closer to home, Theresa May announced her resignation as Prime Minister, creating further uncertainty surrounding the UK's political climate and Brexit. During the month, our Investment Committee added to our overweight position within the alternative investments sector, which should be beneficial during times of global uncertainty. The rest of the strategy remains positioned to take advantage of any longer-term market opportunities should they arise.

#### Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Ascentric, Aviva, Fusion, Hubwise, Nucleus, Standard Life and Transact.

#### Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

#### Risk score

Our strategies are constructed around five investment strategies, each with a differing commitment to equities via collective funds and other asset classes. The strategy is managed with a maximum target of 100% invested in equity markets at any given time and has been categorised as a Bordier UK risk profile 5.
