**Investment update - June**

Solid market performance during June meant that financial assets had a strong finish to the first half of the year, in some areas more than recovering the lost ground seen at the end of 2018. Markets were boosted by a change in rhetoric from major central banks, indicating that further monetary stimulus was likely following weaker economic data, risks to the trade outlook and low inflation. Whilst markets remain undeterred for now, the ongoing uncertainty and potential for a further breakdown in trade negotiations between US/China and the not insignificant matters of Brexit and a highly unstable political backdrop in the UK, could lead to elevated market volatility. However, as things stand at present, global growth, although weaker, is not actually that bad. As long as a disciplined investment approach is maintained, then there should be no need to batten down the hatches or take extreme action during any bouts of market stress. Our current neutral stance on equity risk and overweight cash position across our investment strategies reflects both the opportunities and hazards that are currently being presented, and those that potentially lie ahead. With this in mind, no changes were made to the Adventurous strategy during June.

**Managed Portfolio Service**

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service invests actively in collective investment funds, which helps to ensure that investors benefit from a diversified spread of investments across a wide range of different asset classes, not just in the UK but in overseas markets as well.

There are five investment strategies for you to choose from. Each has its own risk profile and all of them are actively managed by us to ensure that we meet your investment goals. You can choose an income option in all our risk strategies, which means that you could benefit from regular income from your investments as well as potential long-term capital growth.

**Investment objective**

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

**Risk category**

The strategy is managed with a high attitude towards risk with a maximum target of 100% invested in global equity markets at any given time and has received a Defaqto Risk Rating 7 - Medium to High Risk.
