Investment update - June

Solid market performance during June meant that financial assets had a strong finish to the first half of the year, in some areas more than recovering the lost ground seen at the end of 2018. Markets were boosted by a change in rhetoric from major central banks, indicating that further monetary stimulus was likely following weaker economic data, risks to the trade outlook and low inflation. Whilst markets remain undeterred for now, the ongoing uncertainty and potential for a further breakdown in trade negotiations between US/China and the not insignificant matters of Brexit and a highly unstable political backdrop in the UK, could lead to elevated market volatility. However, as things stand at present, global growth, although weaker, is not actually that bad. As long as a disciplined investment approach is maintained, then there should be no need to batten down the hatches or take extreme action during any bouts of market stress. Our current neutral risk position relative to the Dynamic Planner risk boundaries and overweight cash allocation across our investment strategies reflects both the opportunities and hazards that are currently being presented, and those that potentially lie ahead. With this in mind, no changes were made to the RT7 strategy during June.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
