Investment update - July

Stockmarkets seemingly paused for consideration during July following the strong start to year. Early month gains stalled as trade war rhetoric between the US and China heightened, whilst further potential headwinds towards the end of July included the US Federal Reserve lowering interest rates by 0.25% as well as the increased possibility of a no-deal Brexit. During the month our Investment Committee maintained the Adventurous strategy's neutral stockmarket exposure at 90%, though altered the underlying geographic composition. Exposure to Europe and Japan was reduced through the sale of the JOHCM Continental Europe and Invesco Japan funds as both regions are likely to feel the brunt of the US/China trade war whilst continuing to be unresponsive to central bank monetary stimulus. The proceeds were allocated to the US through the purchase of the M&G North American Dividend fund, which should provide a bias to quality, inexpensive growth opportunities with dividend-paying prospects. Purchases were also made in the Franklin UK Equity Income fund at the expense of the Franklin UK Managers' Focus fund as we look to increase our large cap and international bias as well as dividend yield in our UK equity exposure.

Managed Portfolio Service

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service invests actively in collective investment funds, which helps to ensure that investors benefit from a diversified spread of investments across a wide range of different asset classes, not just in the UK but in overseas markets as well.

There are five investment strategies for you to choose from. Each has its own risk profile and all of them are actively managed by us to ensure that we meet your investment goals. You can choose an income option in all our risk strategies, which means that you could benefit from regular income from your investments as well as potential long-term capital growth.

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk category

The strategy is managed with a high attitude towards risk with a maximum target of 100% invested in global equity markets at any given time and has received a Defaqto Risk Rating 7 - Medium to High Risk.
