Investment update - August

Although the press 'silly season' is drawing to a close, President Trump fittingly continues to dominate headlines. His tweets at the beginning of August stating that the U.S. would put an additional 10% tariff on \$300 billion in imports from China had marked consequences; Chinese exports to America fell by 16% in August whilst Chinese imports of US goods fell by around 22%. The US/China trade tensions had further consequence on world equity markets, with increased volatility leading to markets recording their second negative monthly period of the year. Talks of recession have also contributed to volatility as President Trump ramps up the pressure on the US Federal Reserve to cut interest rates to stave off any potential threat. Closer to home, Brexit continues to act as a headwind. The initial lurch towards a 'no-deal' Brexit and subsequent political upheaval has brought the situation into greater focus and contributed to a further decline in the pound and increased uncertainty in financial markets. With the aforementioned headwinds coming to the fore, no changes were made to the Defensive strategy during August as we maintain our neutral stockmarket exposure, which continues to reflect both the longer-term opportunity and shorter-term uncertainty that is currently being presented.

Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Ascentric, Aviva, Fusion, Hubwise, Nucleus, Standard Life and Transact.

Investment objective

The objective is to preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stockmarket behaviour, including modest fluctuations in values.

Risk score

Our strategies are constructed around five investment strategies, each with a differing commitment to equities via collective funds and other asset classes. This strategy is managed with a maximum target of 20% invested in equity markets at any given time and has been categorised as a Bordier UK risk profile 1.
