Investment update - August

Although the press 'silly season' is drawing to a close, President Trump fittingly continues to dominate headlines. His tweets at the beginning of August stating that the U.S. would put an additional 10% tariff on \$300 billion in imports from China had marked consequences; Chinese exports to America fell by 16% in August whilst Chinese imports of US goods fell by around 22%. The US/China trade tensions had further consequence on world equity markets, with increased volatility leading to markets recording their second negative monthly period of the year. Talks of recession have also contributed to volatility as President Trump ramps up the pressure on the US Federal Reserve to cut interest rates to stave off any potential threat. Closer to home, Brexit continues to act as a headwind. The initial lurch towards a 'no-deal' Brexit and subsequent political upheaval has brought the situation into greater focus and contributed to a further decline in the pound and increased uncertainty in financial markets. With the aforementioned headwinds coming to the fore, no changes were made to the RT7 strategy during August as we maintain our neutral risk position relative to the Dynamic Planner risk boundaries, which continues to reflect both the longer-term opportunity and shorter-term uncertainty that is currently being presented.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
