Investment update - October

October saw world markets continue to gather momentum, seemingly borne out of relief rather than optimism. The ongoing US/China trade discussions continue to dominate global market direction, with President Trump's 'phase one' trade deal providing markets with a boost. Closer to home, the threat of a no-deal Brexit has seemingly abated but with an election around the corner, the question remains for how long. The diminished risk of a no-deal saw the pound strengthen over the month, adversely impacting the UK stockmarket where many companies report international earnings. With geopolitical tensions balanced precariously, October saw our Investment Committee undertake a risk reduction exercise to protect the hard-earned gains made this year. Whilst equity exposure remained neutral to the Dynamic Planner risk boundaries, the RT4 strategy saw the sale of the AHFM Defined Returns and Fortem Capital Progressive Growth funds – both structured investment funds sensitive to a sudden reappraisal of risk in equity markets. Furthermore, the Merian Global Equity Absolute Return fund was sold due to concerns over its performance and downside protection capabilities. The proceeds were invested into the Vanguard UK Government Bond Index fund and existing absolute return funds as well as held as additional cash, which in the short term we are happy to hold as we await a potential buying opportunity to exploit.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
