Investment update - December

Markets in December continued to rally after the partial removal of two important issues; the UK's political uncertainty and Brexit (thanks to a convincing Conservative win), and the de-escalation of the US/China trade war. Although there are still many hurdles to overcome in the UK/EU negotiation process, a clearer path should allow a re-boot of business investment and spending, allowing disenchanted investors to return and potentially unlocking economic growth further down the line. Low inflation and the stable interest rate environment in general may also provide a more favourable backdrop for investment in risk assets. As such, our Investment Committee decided to shift away from our previous neutral stockmarket stance by adding 5% to UK equities, taking the Balanced strategy's headline equity target to 55%. The Montanaro UK Income fund has been added to the strategy to provide exposure to quality companies in the UK small and mid-cap sectors whilst also having an equity income focus, which should provide additional return support. To enable the purchase of the fund, there has been a reduction in cash levels and there remains the possibility of adding further exposure to equities in the new year if the improved backdrop remains. Although there may be low rates of economic growth forecast for 2020, which may in turn lead to lower nominal returns, we are happy to report strong returns for 2019 with the Balanced strategy returning 10.3%.

Managed Portfolio Service

Our Managed Portfolio Service ('MPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets directly with Bordier UK. The service invests actively in collective investment funds, which helps to ensure that investors benefit from a diversified spread of investments across a wide range of different asset classes, not just in the UK but in overseas markets as well.

There are five investment strategies for you to choose from. Each has its own risk profile and all of them are actively managed by us to ensure that we meet your investment goals. You can choose an income option in all our risk strategies, which means that you could benefit from regular income from your investments as well as potential long-term capital growth.

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stockmarket behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk category

The strategy is managed with a medium attitude towards risk with a maximum target of 60% invested in global equity markets at any given time and has received a Defaqto Risk Rating 4 - Low Risk.
