Investment update - December

Markets in December continued to rally after the partial removal of two important issues; the UK's political uncertainty and Brexit (thanks to a convincing Conservative win), and the de-escalation of the US/China trade war. Although there are still many hurdles to overcome in the UK/EU negotiation process, a clearer path should allow a re-boot of business investment and spending, allowing disenchanted investors to return and potentially unlocking economic growth further down the line. Low inflation and the stable interest rate environment in general may also provide a more favourable backdrop for investment in risk assets. As such, our Investment Committee decided to slightly increase our risk position within the respective Dynamic Planner volatility boundaries by adding 5% to UK equities, taking the RT4 strategy's headline equity target to 43%. The Montanaro UK Income fund has been added to the strategy to provide exposure to quality companies in the UK small and mid-cap sectors whilst also having an equity income focus, which should provide additional return support. To enable the purchase of the fund, there has been a reduction in cash levels and there remains the possibility of adding further exposure to equities in the new year if the improved backdrop remains. Although there may be low rates of economic growth forecast for 2020, which may in turn lead to lower nominal returns, we are happy to report strong returns for 2019 with the RT4 strategy returning 8.2%.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
