Investment update - January

Volatility returned to markets in January as the World Health Organization declared the Coronavirus epidemic a global health emergency, negating the earlier optimism surrounding the successful first phase of the US/China trade deal. The outbreak has affected oil and mining shares, which declined as global markets priced in the potential fall in demand from China; the world's largest importer of oil. The end of the month also sounded the bell for Brexit, although this was merely a symbolic date as negotiations for a free trade agreement will most likely be ongoing for the rest of the year. The US airstrike on a high-ranking Iranian official during the month, though barely felt across markets, will undoubtedly lead to a rise in further tension in the region. With some uncertainty creeping back into markets, no changes were made to the Adventurous strategy in January. The low rates of economic growth that are forecast may mean lower nominal returns in 2020 than in 2019, but with low inflation and a stable interest rate environment almost everywhere, the potential for better medium and longer-term opportunities remain in risk assets. As such the equity content within the strategy has remained at 95%, with the possibility of adding further exposure to equities if the opportunity arises.

Platform Managed Portfolio Service

Our Platform Managed Portfolio Service ('PMPS') has been awarded the maximum Defaqto 5 stars as a solution for advisers to manage client assets on a third-party platform. The service offers five investment growth strategies ranging from Defensive to Adventurous and is available on the following platforms: Ascentric, Aviva, FundsNetwork, Fusion, Hubwise, James Hay, Novia, Nucleus, Praemium, Seven Investment Management, Standard Life, Transact and Zurich.

Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk score

Our strategies are constructed around five investment strategies, each with a differing commitment to equities via collective funds and other asset classes. The strategy is managed with a maximum target of 100% invested in equity markets at any given time and has been categorised as a Bordier UK risk profile 5. This strategy has received a Defaqto Risk Rating 7 - Medium To High Risk.
