### Investment update - January

Volatility returned to markets in January as the World Health Organization declared the Coronavirus epidemic a global health emergency, negating the earlier optimism surrounding the successful first phase of the US/China trade deal. The outbreak has affected oil and mining shares, which declined as global markets priced in the potential fall in demand from China; the world's largest importer of oil. The end of the month also sounded the bell for Brexit, although this was merely a symbolic date as negotiations for a free trade agreement will most likely be ongoing for the rest of the year. The US airstrike on a high-ranking Iranian official during the month, though barely felt across markets, will undoubtedly lead to a rise in further tension in the region. With some uncertainty creeping back into markets, no changes were made to the strategy in January. The low rates of economic growth that are forecast may mean lower nominal returns in 2020 than in 2019, but with low inflation and a stable interest rate environment almost everywhere, the potential for better medium and longer-term opportunities remain in risk assets. As such the equity content within the strategy has remained at 80%, with the possibility of adding further exposure to equities if the opportunity arises.

### Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia or Transact platforms. The offering provides access to our discretionary management service at a much lower entry level than would normally be available and offers cost-effective portfolio management. The portfolios:

- Offer five investment strategies with different levels of risk and expected return.
- Are rigorously mapped within a specific Dynamic Planner ('DP') risk profile tolerance.
- Can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

### Investment objective

The objective is to build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

### Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
