Investment update - April

Investor optimism over the ability of world leaders to successfully navigate a path out of lockdown brought some relief to markets in April, rebounding from the lows seen in March. US stockmarkets rallied, with the S&P 500 Index rising nearly 13% in local terms; its strongest monthly return since 1987. Closer to home, European markets also rebounded, albeit not as strongly, with the FTSE 100 Index rising almost 4% in the month. Whilst positive news, the UK index is still down nearly 21% year to date and continues to lag other indices partly due to its exposure to oil and energy-related companies, which have been hardest hit. Although central bank and government policy responses have been supportive of an economic recovery, it is widely assumed that economic data will worsen before it improves, with experts having already slashed GDP forecasts for most developed nations. As such, our Investment Committee felt it was prudent to maintain our current positioning across the strategies, with equity exposure remaining around neutral given our recent decisions to raise more liquidity. Our Investment Committee continue to consider an increased commitment to Asia ex. Japan as well as reassessing our fixed interest exposure to see whether there is an opportunity to make our positions work harder for the strategies.

Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Ascentric, Aviva, Embark, Fusion, Hubwise, Nucleus, Standard Life and Transact.

Investment objective

The objective is to preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stockmarket behaviour, including modest fluctuations in values.

Risk profile

This strategy is managed with a maximum target of 20% equity market exposure and is categorised as a **Bordier Risk Profile 1**.

Headline positioning

- ~ Equity exposures are now around neutral again from a combination of market moves and our recent decisions to raise more liquidity.
- ~ Corporate fixed interest exposure has been reduced, as has the exposure to Japan.
- ~ There remains a focus on high levels of liquidity in everything we own.
- ~ Market neutral alternative investments are doing the job we have asked of them and acted as stabilisers. We were right to sell our structured investment funds last Autumn.
