Investment update - June

Global markets continued their recovery in June, in some cases nearly retracing all their steps from the lows seen towards the end of March. This was largely on the back of the immediate and effective response from central banks and Governments who pumped huge amounts of liquidity into the financial system, helping to lower borrowing costs for businesses and restore investor confidence. Markets are likely to remain supported by this continued stimulus, as lower interest rates and low inflation have the propensity to drive up the present value of future profits. However, extensive lockdowns around the world have resulted in recessionary conditions almost everywhere, with world GDP likely to slump by at least 5% in 2020. The re-opening of economies is at a critical juncture, with the coronavirus and the risk of a second wave dictating the shape, pace and durability of the economic recovery. There are also other hurdles to overcome on the horizon, with the US election in November and the Brexit trade deal deadline approaching. With these hurdles in mind, our Investment Committee decided to remove the sterling-hedged funds from within our US exposure. Although the US is facing potential headwinds in the form of the election and the trade war with China, our Investment Committee believes that the outlook for the dollar is stronger than for sterling, with sterling likely to be hit to a greater extent from coronavirus and Brexit talks going forward.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

The objective is to assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk category

The strategy is managed in accordance with DP risk profiles and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- ~ Equity exposures are now around neutral again from a combination of market moves and our recent decisions to raise more liquidity.
- ~ Corporate fixed income exposure has increased, specifically targeting the higher quality investment grade space.
- ~ Cash levels have been reduced to neutral.
- ~ There remains a focus on high levels of liquidity in everything we own.
- ~ Market neutral alternative investments are continuing to act as stabilisers. We were right to sell our structured investment funds last Autumn.
