Investment update - August

Investor sentiment improved during August on the back of a better than expected second-quarter earnings season and with the hope of a Covid-19 vaccine around the corner. Markets continue to be buoyed by the unprecedented levels of stimulus from governments and central banks, which show no signs of abating. Meanwhile, interest rates seem set to remain lower for longer, providing markets with a supportive backdrop for the foreseeable future. The availability of cheap money has also resulted in the 'TINA' ('there is no alternative') effect, further increasing momentum in equity markets. However, there are potential headwinds in the shape of further virus outbreaks, trade concerns and the impending US election and Brexit transition deadline. There were no changes made to the strategy in August, with the strategy's risk position remaining around neutral relative to Dynamic Planner's risk boundaries. This reflects our Investment Committee's view that markets are finely balanced. We remain comfortable having circa three quarters of our equity exposure in overseas markets and believe that the regions we have recently redistributed equity risk to, the US and Asia, are more likely to offer superior economic growth prospects relative to the UK and also host a far wider range of market leading companies in key sectors such as technology and healthcare. Our Investment Committee continue to monitor events closely and are willing to adjust the strategy's positioning if an appropriate opportunity presents itself.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Aviva and Standard Life platforms.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stockmarket behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed in accordance with **Dynamic Planner risk profile 6**, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- Equity exposure remains neutral, with around three quarters of our stockmarket exposure now outside of the UK.
- We maintain our increased corporate fixed income exposure, specifically targeting the higher quality investment grade space.
- Cash levels remain at neutral.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers. We were right to sell our structured investment funds last Autumn.
