Investment update - August

Investor sentiment improved during August on the back of a better than expected second-quarter earnings season and with the hope of a Covid-19 vaccine around the corner. Markets continue to be buoyed by the unprecedented levels of stimulus from governments and central banks, which show no signs of abating. Meanwhile, interest rates seem set to remain lower for longer, providing markets with a supportive backdrop for the foreseeable future. The availability of cheap money has also resulted in the 'TINA' ('there is no alternative') effect, further increasing momentum in equity markets. However, there are potential headwinds in the shape of further virus outbreaks, trade concerns and the impending US election and Brexit transition deadline. There were no changes made to the strategy in August, with stockmarket exposure remaining around neutral, reflecting our Investment Committee's view that markets are finely balanced. We remain comfortable having circa three quarters of our equity exposure in overseas markets and believe that the regions we have recently redistributed equity risk to, the US and Asia, are more likely to offer superior economic growth prospects relative to the UK and also host a far wider range of market leading companies in key sectors such as technology and healthcare. Our Investment Committee continue to monitor events closely and are willing to adjust the strategy's positioning if an appropriate opportunity presents itself.
