Investment update - October

A rise in COVID-19 cases during October resulted in the re-introduction of widespread restrictions across Europe, leading to a fall in world equity markets towards the end of the month. Investor sentiment had remained relatively neutral throughout the majority of October as the US presidential election dominated headlines and Boris Johnson missed his self-imposed Brexit deadline as the impasse continues. Our Investment Committee remain confident with the make-up of the strategy, therefore no changes were made during October. The total allocation to global stockmarkets across our strategies remain at broadly neutral levels, with around 80% of equity exposure lying outside of the UK where we believe greater longer-term opportunities exist. Our fixed income positioning continues to target high quality, investment grade corporate bonds, which offer prospects for attractive income and capital growth. The absolute return funds that make up the alternatives sector of the strategy should continue to act as market stabilisers. The ongoing uncertainty and impact of COVID-19 means our Investment Committee continues to closely monitor current events and will modify the strategies' positioning, including utilising our additional cash weightings, if new buying opportunities arise.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 6 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.
