Investment update - January

January saw continued optimism for risk assets following the global roll-out of COVID-19 vaccinations coupled with the promise of further stimulus. This was despite near-term headwinds, such as renewed winter lockdowns and new variants of the disease, which were overlooked by investors. However, January's early market gains were lost towards the month end following a coordinated effort by a group of retail investors to increase the share price of heavily shorted stocks, typically held by hedge funds. This "short squeeze" caused a spike in volatility across a range of markets. Although we have exposure to long/short funds in our alternatives exposure, the effects of the short squeeze have been largely immaterial given that our fund managers tend to avoid controversial or crowded shorts and our funds are market-neutral in nature. These actions may have increased short-term volatility but economic recoveries in 2021 are still likely to be some of the largest on record and as such, no changes have been made to the strategy in January. The more resilient economies of Asia and the US look set to come through the crisis in better shape than the UK and continental Europe and as such we have maintained our overweight positioning to these regions. Recent allocations made to sustainable energy and infrastructure funds in the thematic/global sector last month have proved beneficial for performance and this sector should benefit from structural long-term growth and policy support from all key regions of the world.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 5 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- We have increased the strategy's risk exposure to the upper risk boundary, whilst still targeting the assigned Dynamic Planner risk profile.
- We maintain our increased corporate fixed income exposure, specifically targeting the higher quality investment grade space.
- Cash levels have been reduced to fund a new allocation to the thematic and global sector.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers. We were right to sell our structured investment funds in Autumn 2019.
