Investment update - February

Fuelled by the swift COVID-19 vaccination rollout as well as the continuing decline in the number of new infections, February saw global markets rise as investors shrugged off the market volatility caused by the coordinated attacks on short sellers of GameStop shares towards the end of January. There has also been a cyclical move in recent months as economies continue to reopen, with lower-valued sectors of the market continuing to fare well. Investors were, however, spooked towards the end of the month by the steepening of yield curves and the prospects of rising inflation. The key drivers behind these inflation concerns were the US stimulus package as well as faster economic growth potentially triggering a reversal in the monetary policy stances of central banks. Whether this has been an overreaction is yet to be seen but our Investment Committee believe that further conditions need to be met before monetary policy becomes less accommodative. Additionally, central bank rhetoric regarding monetary policy remains in support of keeping interest rates lower for the time being and a willingness to let inflation run hot in the short term. Our Investment Committee remain vigilant and continue to closely monitor current events and whilst no strategic changes were made during the month, it was decided that for tactical reasons we would sell the Artemis US Absolute Return fund. Further details on this change will follow next month once implemented. Some minor asset allocation adjustments will also be made to maintain alignment with the strategy's corresponding Dynamic Planner risk profile.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk profile

The strategy is managed in accordance with DP risk profile 3 and is part of their Risk Targeted Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- We have increased the strategy's risk exposure to the upper risk boundary, whilst still targeting the assigned Dynamic Planner risk profile.
- We maintain our increased corporate fixed income exposure, specifically targeting the higher quality investment grade space.
- Cash levels have been reduced to fund a new allocation to the thematic and global sector.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers. We were right to sell our structured investment funds in Autumn 2019.
