Investment update - March

Markets have come a long way since their nadir last March thanks to the prospect, and now rollout, of COVID-19 vaccines along with the substantial support given by governments and central banks. This monetary and fiscal stimulus is likely to remain in place, which should allow both a relatively stable economic recovery and risk assets to prosper further. As such, the strategy's equity positioning has been maintained at the top end of the allowable equity range with a bias remaining towards the parts of the world where we expect stronger and more resilient economic growth trajectories i.e. the US and Asia-Pacific ex. Japan. Whilst 'growth' stocks generally dictated the direction of markets for the majority of 2020, 'value' stocks have recently seen a period of better performance. We continue to take a blended approach and are happy with having feet in both the 'growth' and 'value' market camps. The immediate outlook for fixed interest investments is confused by the inflation debate. We maintain a diversified approach, with exposure towards corporate and inflation-linked bonds as well as to strategic bond managers who should be able to pivot quickly to minimise risks or take advantage of opportunities. During the month an underlying change was made to our alternatives exposure, with the Artemis US Absolute Return fund being sold for tactical reasons. The proceeds from this sale were redistributed to other absolute return funds held within the strategy.

Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Ascentric, Aviva, Embark, Fusion, Hubwise, Novia, Nucleus, Seven IM, Standard Life and Transact.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed with a maximum target of 80% equity market exposure and is categorised as a **Bordier Risk Profile 4**.

Headline positioning

- The strategy's equity positioning remains at the top end of the allowable equity range with a bias to the US and Asia-Pacific ex. Japan.
- We maintain a diversified approach to our fixed income exposure, with increased allocations to corporate and inflation-linked bonds as well as to strategic bond managers.
- Cash levels remain reduced following our allocation to the thematic and global sector in December last year.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.
