Investment update - April

April was another strong month for equities with developed markets rising nearly 5%. The rollout of vaccines in the UK and US continues apace and is accelerating in Europe – giving markets greater confidence in the extent and speed of the economic recovery. Recent economic data is also proving supportive – the US economy grew by an annualised 6.4% in Q1. In the UK, both manufacturing and services Purchasing Managers' Indexes continue to rebound strongly. Economic recovery remains more muted in the eurozone although there are tentative signs of a return to positive territory. Within emerging markets, most economies remain resilient (including China), however the worsening situation with the virus in India is clearly a cause for concern. Inflation data and expectations remain key. Shorter-term indicators in most key regions continue to shift upwards, however there has been no change in rhetoric from central banks, which continue to refer to this as a transitory rise. No changes were made to the strategy, which remains at the upper end of the corresponding Dynamic Planner risk profile. Fixed income exposure remains well diversified, with allocations to investment grade corporate and inflation-linked bonds as well as to strategic bond managers who can dynamically manage exposures to interest rates, currencies and credit quality as market expectations and yields shift. Our alternatives exposure is positioned to stabilise portfolio returns and provide a degree of protection against any shorter-term periods of market weakness.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Aegon, Ascetric, Aviva, James Hay, Old Mutual, Standard Life and Standard Life Elevate platforms.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 7, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- The strategy remains at the upper end of the corresponding Dynamic Planner risk profile with a bias in equity exposure to the US and Asia-Pacific ex. Japan.
- We maintain a diversified approach to our fixed income exposure, with increased allocations to corporate and inflation-linked bonds as well as to strategic bond managers.
- Cash levels remain reduced following our allocation to the thematic and global sector in December last year.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.
