Investment update - April

April was another strong month for equities with developed markets rising nearly 5%. The rollout of vaccines in the UK and US continues apace and is accelerating in Europe – giving markets greater confidence in the extent and speed of the economic recovery. Recent economic data is also proving supportive – the US economy grew by an annualised 6.4% in Q1. In the UK, both manufacturing and services Purchasing Managers' Indexes continue to rebound strongly. Economic recovery remains more muted in the eurozone although there are tentative signs of a return to positive territory. Within emerging markets, most economies remain resilient (including China), however the worsening situation with the virus in India is clearly a cause for concern. Inflation data and expectations remain key. Shorter-term indicators in most key regions continue to shift upwards, however there has been no change in rhetoric from central banks, which continue to refer to this as a transitory rise. No changes were made to the strategy, with equity positioning being maintained at the top end of the allowable equity range. Fixed income exposure remains well diversified, with allocations to investment grade corporate and inflation-linked bonds as well as to strategic bond managers who can dynamically manage exposures to interest rates, currencies and credit quality as market expectations and yields shift. Our alternatives exposure is positioned to stabilise portfolio returns and provide a degree of protection against any shorter-term periods of market weakness.

Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Ascentric, Aviva, Embark, Fusion, Hubwise, Novia, Nucleus, Seven IM, Standard Life and Transact.

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk profile

This strategy is managed with a maximum target of 20% equity market exposure and is categorised as a **Bordier Risk Profile 1**.

Headline positioning

- The strategy's equity positioning remains at the top end of the allowable equity range with a bias to the US and Asia-Pacific ex. Japan.
- We maintain a diversified approach to our fixed income exposure, with increased allocations to corporate and inflation-linked bonds as well as to strategic bond managers.
- Cash levels remain reduced following our allocation to the thematic and global sector in December last year.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.
