Investment update - May

Equities made further progress in May; corporate earnings announcements, both in the US and elsewhere, have generally surpassed expectations so far this year and economic activity is picking up strongly in many regions. Key indicators such as Purchasing Managers' Indices are rising quicker than expected, while vaccine rollout programs continue to progress well and data around their efficacy remains encouraging. The outlook for inflation continues to be a key influence on markets. Headline inflation in the US again rose more than expected, however the rhetoric from the US Federal Reserve, which has talked down the prospect of changing rate policy, remains unchanged. The opening up of the economy in the UK is also leading to quite a dramatic recovery in retail sales, which is in turn driving pockets of price inflation in the short term. No changes were made to the strategy in May as our Investment Committee continues to believe that equity markets are well supported by the prospect of a broad global economic recovery and continued stimulus from governments and central banks. Company earnings announcements in key regions also look broadly encouraging and, as a result, each strategy remains at the upper end of their corresponding Dynamic Planner risk profile. Given the unclear outlook for inflation, our fixed interest exposure remains diversified, with allocations to corporate and inflation-linked bonds in addition to strategic managers who can pivot quickly to minimise risks or take advantage of mispriced opportunities.
