Investment update - August

Global equities rose by 2.5% in August as markets continue to perform strongly, whilst volatility remained perhaps surprisingly low. Sentiment among equity investors was buoyed by US Federal Reserve Chair Jerome Powell's comments playing down the prospect of earlier than expected interest rate increases or an acceleration in the anticipated schedule of asset purchase tapering. Strong earnings announcements have driven US indices to new all-time highs, whilst those announced in Europe have also been encouraging. Investor interest in the UK market was centred on the smaller cap end of the market, where several M&A bids have been announced recently. Emerging market equities initially declined but ended the month in positive territory. Government bond yields rose globally as headline inflation rates increased, bringing the potential prospect of tighter monetary policy. However, central bank rhetoric continues to emphasise that inflation is expected to moderate into next year and that policy should remain supportive for risk assets. As such, no changes were made to the strategy during the month, with equity exposure maintained at the top end of the allowable equity range. This decision is proving beneficial as markets respond to positive economic and corporate data. Our fixed income exposure remains well diversified whilst our Investment Committee believe that our alternative investments that are deploying 'market neutral' strategies could provide a valuable tool against the possibility of some elevated market volatility.

Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Ascentric, Aviva, Embark, Fusion, Hubwise, Novia, Nucleus, Seven IM, Standard Life and Transact.

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk profile

This strategy is managed with a maximum target of 20% equity market exposure and is categorised as a **Bordier Risk Profile 1**.

Headline positioning

- The strategy's equity positioning remains at the top end of the allowable equity range with a bias to the US and Asia-Pacific ex. Japan.
- We maintain a diversified approach to our fixed income exposure, with increased allocations to corporate and inflation-linked bonds as well as to strategic bond managers.
- Cash levels remain reduced following our allocation to the thematic and global sector in December last year.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.
