Investment update - September

World equity markets declined around 4% in September although US dollar strength, and some weakness in sterling, did serve to alleviate some of these losses for sterling-based investors. The change in sentiment was driven primarily by lowering growth forecasts and concerns over the potential impact of supply disruptions and rising inflationary pressures. Comments from the world's major central banks were hawkish, with interest rate rises potentially occurring earlier than expected whilst accommodative policy stances remain likely to be withdrawn as planned in the future. The recent trends of weaker activity, combined with higher inflation (which is seemingly stickier than originally forecast), and still elevated unemployment levels, are further complicating the picture for central banks. Markets so far, however, continue to be reassured by their measured reactions and ability to perform a more complicated juggling act. Indeed, it seems likely that central banks' policies will, in the short term, remain accommodative. This backdrop should continue to be supportive for risk assets for the remainder of 2021 and into 2022. As such, no changes were made to the strategy during the month, with the strategy remaining at the upper end of the corresponding Dynamic Planner risk profile. Any setbacks are expected to be short-lived as investor cash continues to accumulate and needs a better home to combat the vagaries of inflation.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Aegon, Ascentric, Aviva, James Hay, Old Mutual, Standard Life and Standard Life Elevate platforms.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 6, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- The strategy remains at the upper end of the corresponding Dynamic Planner risk profile with a bias in equity exposure to the US and Asia-Pacific ex. Japan.
- We maintain a diversified approach to our fixed income exposure, with increased allocations to corporate and inflation-linked bonds as well as to strategic bond managers.
- Cash levels remain reduced following our allocation to the thematic and global sector in December last year.
- There remains a focus on high levels of liquidity in everything we own.
- Market neutral alternative investments continue to act as stabilisers.
