Investment update - November

Concerns over the new Omicron variant led to a sharp reversal in equity markets towards the end of November and developed markets ended the month over 2% down. Investors are now looking to ascertain the efficacy of vaccines against the Omicron variant and the potential requirement for further lockdowns and other restrictions globally. However, there appears to be some optimism in terms of the likely protection offered by existing vaccines and also a belief that key economies will be more resilient to potential lockdowns. Nevertheless, central banks face an even more muddied picture in terms of inflation outlook. Prior to the Omicron variant, the rhetoric from the US Federal Reserve was becoming more hawkish in the face of the Consumer Price Index rising above 6%. It remains to be seen to what extent the potentially damaging economic consequences of the new variant might impact that view. During the month, no changes were made to the strategy at a headline level, which has been maintained at the upper end of the respective Dynamic Planner risk profile. With heightened levels of inflation in many developed economies, investors seeking real returns continue to look to equities. We are, as ever, mindful of the current risks and as such have added further diversification, with the addition of the Artemis Target Return Bond fund, to our alternatives exposure, which continues to provide embedded protection in the shape of lower risk and absolute return focused holdings.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Aegon, Ascetric, Aviva, James Hay, Old Mutual, Standard Life and Standard Life Elevate platforms.

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk profile

The strategy is managed in accordance with **Dynamic Planner risk profile 3**, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- The strategy remains at the upper end of the corresponding Dynamic Planner risk profile with a bias in equity exposure to the US and Asia-Pacific ex. Japan.
- Within our active equity exposure, we maintain a blend of both 'growth' and 'value' investment styles, with a preference towards flexible all-cap managers that can rotate into mid/small caps to help enhance longer term growth.
- In our lower risk strategies, we have reduced exposure to corporate bond funds in favour of flexible strategic bond funds, inflation-linked bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
