Investment update - November

Concerns over the new Omicron variant led to a sharp reversal in equity markets towards the end of November and developed markets ended the month over 2% down. Investors are now looking to ascertain the efficacy of vaccines against the Omicron variant and the potential requirement for further lockdowns and other restrictions globally. However, there appears to be some optimism in terms of the likely protection offered by existing vaccines and also a belief that key economies will be more resilient to potential lockdowns. Nevertheless, central banks face an even more muddled picture in terms of inflation outlook. Prior to the Omicron variant, the rhetoric from the US Federal Reserve was becoming more hawkish in the face of the Consumer Price Index rising above 6%. It remains to be seen to what extent the potentially damaging economic consequences of the new variant might impact that view. During the month, no changes were made to the strategy at a headline level, which has been maintained at the upper end of the respective Dynamic Planner risk profile. With heightened levels of inflation in many developed economies, investors seeking real returns continue to look to equities. We are, as ever, mindful of the current risks and as such have added further diversification, with the addition of the Artemis Target Return Bond fund, to our alternatives exposure, which continues to provide embedded protection in the shape of lower risk and absolute return focused holdings.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Novia, Standard Life and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 5 and is part of their Risk Targeted Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategy remains at the upper end of the corresponding Dynamic Planner risk profile with a bias in equity exposure to the US and Asia-Pacific ex. Japan.
- We maintain a blend of both 'growth' and 'value' investment styles with a preference towards flexible all-cap managers that can rotate into mid/small caps to help enhance longer term growth.
- In our lower risk strategies, we have reduced exposure to corporate bond funds in favour of flexible strategic bond funds, inflation-linked bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
