Investment update - February

February was another challenging month for markets. Investor concerns were initially centred on the continued increase in inflation and how this may pressure central banks to raise interest rates. Attention then turned to the escalation in the Ukraine/Russia conflict. The conflict itself, as well as the likely disruption to Russia's commodity exports, pushed the oil price above \$100 a barrel and gas prices up a further 15%. Growth stocks declined, with European equities falling most given the dependence on Russian oil and gas. Closer to home, the Bank of England raised interest rates by 25 basis points with rates expected to end the year above 1.5%. Given April's likely energy hikes, most assume inflation in the UK will rise further. While the uncertainty in terms of inflation and global growth might continue to impact the near-term pricing of risk assets, we believe this commodity-induced inflation spike could be relatively short-lived, as it has been in previous energy-linked conflicts. As such, there were no changes to the strategy during the month, which remains at the upper end of its corresponding Dynamic Planner risk profile. We continue to favour equities as earnings announcements remain positive, valuations do not look overly demanding and investor appetite is likely to return. Elsewhere in the strategy our bond positioning remains defensive, with limited exposure to interest rate movements, whilst our alternatives funds are targeting uncorrelated returns through market neutral, relative value strategies.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Aegon, Ascetric, Aviva, James Hay, Old Mutual, Standard Life and Standard Life Elevate platforms.

Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

Risk profile

The strategy is managed in accordance with **Dynamic Planner risk profile 3**, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- The strategy remains at the upper end of the corresponding Dynamic Planner risk profile with a bias in equity exposure to the US and Asia-Pacific ex. Japan.
- Within our active equity exposure, we maintain a blend of both 'growth' and 'value' investment styles, with a preference towards flexible all-cap managers that can rotate into mid/small caps to help enhance longer term growth.
- In our lower risk strategies, we have reduced exposure to corporate bond funds in favour of flexible strategic bond funds, inflation-linked bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
