Investment update - March

Global developed equity markets rallied 2.5% during March, recovering some of the losses seen earlier in the quarter. There was disparity in regional market returns, with the US market gaining over 3% whilst European markets fell. The US Federal Reserve, looking to address inflationary pressures, raised rates (by 0.25%) for the first time since 2018. In the UK, the latest forecasts suggest that inflation might peak at close to 9% before subsiding next year. Focus remains on how central bank policy combats these heightened levels of inflation versus supporting potentially fragile economic growth. The conflict in Ukraine is having a profound effect on energy prices, and in turn on inflation, given Russia's importance as a provider of oil and gas. Food and other commodity prices have also been significantly impacted. Financial markets have experienced a nervy start to the year; however, history dictates that it is often best to sit tight in terms of headline equity exposure during these periods. We continue to maintain equity allocations at their current level, with the strategy remaining at the upper end of its corresponding Dynamic Planner risk profile. We have, however, altered underlying equity exposures, reducing our weighting to Europe – which is currently facing the brunt of the geopolitical conflict between Russia and Ukraine – and topping up allocations to infrastructure, which not only boasts both defensive and inflation-protection characteristics, but also provides greater exposure to regions outside of Europe.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Aegon, Ascetric, Aviva, James Hay, Old Mutual, Standard Life and Standard Life Elevate platforms.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect reasonable correlation to stock market behaviour and rewards, including quite sharp fluctuations in values, but also some protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 5, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocations to infrastructure, which not only boasts both defensive and inflation-protection characteristics, but also provides greater exposure to regions outside of Europe.
- In our lower risk strategies, we continue to favour inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
