Investment update - April

April proved to be a difficult month for markets with both global equities and bonds falling 8% and 5% respectively. The continued conflict in Ukraine and the prospect of tightening monetary policy to combat rising inflation weighed heavily on sentiment. With inflation in the US rising to 8.5%, the rhetoric from US Federal Reserve members continues to turn towards further increases in interest rates. This resulted in both shorter- and longer-term bond yields sharply rising. Central banks are facing a difficult balancing act of tightening policy to curb inflationary pressures without causing too much impact on growth and consumption. Weakening economic growth data and rising inflation again impacted growth stocks. The economic backdrop is undoubtedly complicated at present and there is uncertainty across markets. However, we think it is right to maintain stockmarket positions at their current levels, with no changes made to the strategy during the month. The strategy's positioning, which remains at the upper end of its corresponding Dynamic Planner risk profile, provides the opportunity to generate returns that can combat rising inflation. Outside of stockmarkets, our strategic bond managers and positions in index-linked bonds are helping to offset the difficulties in conventional bond markets from rising inflation and interest rates, whilst market neutral 'alternative' investment funds are acting as good diversifiers of return during more challenging times for markets.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Abrdn, Novia and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 6 and is part of their Risk Targeted Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocations to infrastructure, which not only boasts both defensive and inflation-protection characteristics, but also provides greater exposure to regions outside of Europe.
- In our lower risk strategies, we continue to favour inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
