Investment update - May

Global equities were broadly flat in May although there was a divergence in fortunes across different market sectors. While value stocks rallied, growth stocks declined due to continued concerns over rising inflation, potentially more aggressive central bank monetary policy tightening and the impact of the Ukraine/Russia conflict. The Bank of England raised rates from 0.75% to 1% – bond returns had no set pattern as a fair degree of the developed markets' pro-interest rate hike rhetoric has seemingly been priced in. The conflict in Ukraine continues to create supply-side issues and uncertainties on some commodities, fuelling inflationary pressures. Increasingly tight labour markets are also beginning to drive wage growth and central banks now have an unenviable task to dampen inflation without stifling economic recovery. There were no changes to the strategy during the month as we believe that our approach of actively managing asset allocation and ensuring broad diversification means the strategy is well placed to navigate this period of uncertainty. Equities have historically provided effective protection against heightened inflation, and we think it is right to maintain stockmarket positions at their current levels, with the strategy remaining at the upper end of its corresponding Dynamic Planner risk profile. We are mindful of the potential risks to bond markets; however, we are also open to any opportunities that may arise. Our alternatives exposure is also proving valuable as a place where we can identify funds designed to produce returns, regardless of overall market direction.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Abrdn, Novia and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 7 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocations to infrastructure, which not only boasts both defensive and inflation-protection characteristics, but also provides greater exposure to regions outside of Europe.
- In our lower risk strategies, we continue to favour inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
