#### Investment update - June

Continued concerns over inflation and weakening growth led to a further equity market sell off in June. Global equities have now fallen over 18% in local currency terms this year representing the worst H1 period in over 50 years. Consumer confidence continues to fall in most regions and has hit record lows in the UK, which is facing one of the most acute squeezes in (negative) real wage growth. The Bank of England and the US Federal Reserve once again raised rates whilst the European Central Bank signalled that it would raise rates once it had ceased asset purchases. Equity valuations overall look undemanding and positive economic growth is still widely forecast over the next two or three years in most regions. Taking a medium-term view that the current downturn will be relatively short-lived, we are maintaining our commitment to equities, with the strategy remaining at the upper end of its corresponding Dynamic Planner risk profile. With attention potentially turning to protecting growth rather than curbing inflation, an opportunity has arisen to take a little more risk within bond markets. We have therefore reduced some of the more defensive biases to fixed interest positioning. Where appropriate, we have also added to alternative investments, by allocating to the TM Tellworth UK Select fund, at the expense of some fixed interest exposure. Genuinely alternative investments are likely to continue to act as strategy stabilisers and sources of good risk diversification and return if traditional assets continue to come under some pressure.

### Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Abrdn, Novia and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

#### Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

#### Risk profile

The strategy is managed in accordance with DP risk profile 6 and is part of their Risk Targeted Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

## Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocations to infrastructure, which not only boasts both defensive and inflation-protection characteristics, but also provides greater exposure to regions outside of Europe.
- In our lower risk strategies, we continue to favour inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
