#### Investment update - September

The market sell-off in August continued into September, driven by persistent high inflation, hawkish rhetoric from central banks and downward expectations for economic growth. It was a particularly tumultuous month in the UK. The government's 'mini-budget', which set out plans for a larger-than-expected fiscal package and further substantial government borrowing, caused a spike in gilt yields and a dramatic fall in sterling to an historic low of \$1.03. Intervention by the Bank of England, who purchased longer-dated issues in an attempt to stabilise bond prices, led to a modest recovery in gilts by the month's end. The continued hawkish backdrop pushed bond yields significantly higher and prices lower. Both the US Federal Reserve and European Central Bank increased rates by a further 75 bps in September. On a potentially more positive note, the resilience of corporate earnings may suggest that equity markets have priced in much of the bad news. The same can potentially be said of some areas of the fixed interest markets if inflationary pressures are indeed set to recede. As such, no changes were made during the month as we maintain our commitment to equities, which have historically provided the best defence against inflation. The strategy remains at the upper end of its corresponding Dynamic Planner risk profile. At some point the coast may become clearer for fixed interest markets but volatility currently remains extremely high. Until then, allocations to highly liquid 'alternative' investment funds, which exhibit low levels of volatility and function as an effective risk management tool, are being maintained.

#### Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Abrdn, Aegon, Aviva, James Hay, M&G Wealth and Old Mutual platforms.

#### Investment objective

To preserve capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect low levels of reward and a low correlation to stock market behaviour, including modest fluctuations in values.

#### Risk profile

The strategy is managed in accordance with **Dynamic Planner risk profile 3**, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

## Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- In our lower risk strategies, we continue to favour inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
