Investment update - September

The market sell-off in August continued into September, driven by persistent high inflation, hawkish rhetoric from central banks and downward expectations for economic growth. It was a particularly tumultuous month in the UK. The government's 'mini-budget', which set out plans for a larger-than-expected fiscal package and further substantial government borrowing, caused a spike in gilt yields and a dramatic fall in sterling to an historic low of \$1.03. Intervention by the Bank of England, who purchased longer-dated issues in an attempt to stabilise bond prices, led to a modest recovery in gilts by the month's end. The continued hawkish backdrop pushed bond yields significantly higher and prices lower. Both the US Federal Reserve and European Central Bank increased rates by a further 75 bps in September. On a potentially more positive note, the resilience of corporate earnings may suggest that equity markets have priced in much of the bad news. The same can potentially be said of some areas of the fixed interest markets if inflationary pressures are indeed set to recede. As such, no changes were made during the month as we maintain our commitment to equities, which have historically provided the best defence against inflation. The strategy remains at the upper end of its corresponding Dynamic Planner risk profile. At some point the coast may become clearer for fixed interest markets but volatility currently remains extremely high. Until then, allocations to highly liquid 'alternative' investment funds, which exhibit low levels of volatility and function as an effective risk management tool, are being maintained.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Abrdn, Novia and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To assist investors looking to preserve their capital in real (inflation-adjusted) terms over the medium to longer term but who feel comfortable with some moderate fluctuation in values.

Risk profile

The strategy is managed in accordance with DP risk profile 4 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- In our lower risk strategies, we continue to favour inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
