### Investment update - January

2023 has begun brightly for investors with developed market equities rising nearly 5% in January. Market sentiment was buoyed by further evidence that inflation is falling in key regions and the consequent hope that central banks may soon be able to end their cycle of rate hikes. Indeed, inflation in the US fell in January, driven primarily by lower energy and food prices. In the eurozone inflation also receded, while economic data indicated that the region had narrowly avoided recession in Q4. Concerns over the energy supply crisis in Europe alleviated further due to government support and falling gas prices. The UK market also produced a strong return. CPI fell modestly although the expectation of the UK facing 'higher for longer' inflation than most of the developed world remains as strong wage growth appears to be putting pressure on the services sector in particular; recession fears also persist. We have been well positioned to capture the strong returns from equity markets in January as the strategy remains at the top end of its allowable equity range. Greater visibility on inflation moderating and on the likely peak in rates across key markets is improving sentiment and equities remain our preferred asset class for potential real returns going forward. We have high conviction in terms of our equity positioning and are targeting areas of relative economic and corporate strength, which includes the US and Asian markets as well as sectors such as infrastructure and sustainable energy.

### Hybrid Passive Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the following platforms: Abrdn, Aviva, Embark, FundsNetwork, Fusion, Hubwise, M&G Wealth, Novia, Nucleus, 7IM, Quilter and Transact.

### Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

### Risk profile

The strategy is managed with a maximum target of 100% equity market exposure and is categorised as a **Bordier Risk Profile 5**.

## Headline positioning

- The strategies remain at the upper end of their allowable equity range with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- In our lower risk strategies, we continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
