Investment update - January

2023 has begun brightly for investors with developed market equities rising nearly 5% in January. Market sentiment was buoyed by further evidence that inflation is falling in key regions and the consequent hope that central banks may soon be able to end their cycle of rate hikes. Indeed, inflation in the US fell in January, driven primarily by lower energy and food prices. In the eurozone inflation also receded, while economic data indicated that the region had narrowly avoided recession in Q4. The UK market also produced a strong return. CPI fell modestly although the expectation of the UK facing 'higher for longer' inflation than most of the developed world remains, as do recession fears. We have been well positioned to capture the strong returns from equity markets in January as the strategy remains at the top end of its allowable equity range. We have high conviction in terms of our equity positioning and are targeting areas of relative economic and corporate strength, which includes the US and Asian markets as well as sectors such as infrastructure and sustainable energy. We have also benefitted from the recovery in fixed income markets and this month took further advantage of attractive opportunities in the corporate bond space by increasing our allocation to the Schroder Strategic Credit and TwentyFour Corporate Bond funds. It is felt the opportunity for future returns is greater in the corporate bond market and to accommodate this change, our absolute return bond exposure within our alternatives allocation has been reduced.

Headline positioning

- ~ The strategies remain at the top end of their allowable equity range with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- ~ We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- ~ In our lower risk strategies, we continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- ~ Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
