Investment update - January

2023 has begun brightly for investors with developed market equities rising nearly 5% in January. Market sentiment was buoyed by further evidence that inflation is falling in key regions and the consequent hope that central banks may soon be able to end their cycle of rate hikes. Indeed, inflation in the US fell in January, driven primarily by lower energy and food prices. In the eurozone inflation also receded, while economic data indicated that the region had narrowly avoided recession in Q4. Concerns over the energy supply crisis in Europe alleviated further due to government support and falling gas prices. The UK market also produced a strong return. CPI fell modestly although the expectation of the UK facing 'higher for longer' inflation than most of the developed world remains as strong wage growth appears to be putting pressure on the services sector in particular; recession fears also persist. We have been well positioned to capture the strong returns from equity markets in January as the strategy remains towards the upper end of its corresponding Dynamic Planner risk profile. Greater visibility on inflation moderating and on the likely peak in rates across key markets is improving sentiment and equities remain our preferred asset class for potential real returns going forward. We have high conviction in terms of our equity positioning and are targeting areas of relative economic and corporate strength, which includes the US and Asian markets as well as sectors such as infrastructure and sustainable energy.

Risk Targeted Managed Service

Our Risk Targeted ('RT') Managed Service is available directly through our Bordier UK platform or via the Abrdn, Novia and Transact platforms. There are five actively managed investment strategies available, each with different levels of risk and expected return, that are rigorously mapped within a specific Dynamic Planner risk profile tolerance. Each can be held within general investment accounts, ISAs, SIPPs and other wrappers (platform dependent).

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, and be entirely comfortable with substantial volatility and very limited protection in times of market weakness.

Risk profile

The strategy is managed in accordance with DP risk profile 7 and is part of their Risk Target Managed ('RTM') offering. The strategy's expected volatility is targeted to stay within the assigned DP risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- In our lower risk strategies, we continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
