Investment update - March

March proved ultimately to be a positive month for equities as global economic data generally continues to surprise on the upside. The month did not pass without incident however as the collapse of Silicon Valley Bank in the US and the subsequent, largely unrelated, failure of Credit Suisse stoked fears of a financial crisis. However, a recovery ensued following reassurances from central banks about the financial sector's health and a general belief that the banking sector is well capitalised post the reforms after the 2008 financial crisis. One likely consequence of the pressures within the financial sector is a further tightening in bank lending standards. This might provide a further brake to growth and inflation, potentially reducing the need for further rate rises. This, added to the already increasingly dovish stance of central banks led to a fall in bond yields (and rise in bond values). While sentiment became more dovish over the month, key central banks did go ahead with further rate rises, citing areas of stubborn core inflation and tight labour markets driving wage pressures within the services sector. No changes were made over the month as the strategy remains aligned to its corresponding Dynamic Planner risk profile. We are encouraged by the improving economic backdrop and the positive outlook for corporate earnings as equity exposures are maintained, whilst we remain happy with the underlying make-up of the rest of the strategy.

Hybrid Passive Risk Targeted Managed Service

The service consists of five actively managed investment strategies, offering lower cost access to our discretionary fund management capabilities, through the combination of active and passive collective investments. The service provides a solution that, when cost considerations are paramount, does not compromise on quality. Investment strategies are monitored by our central Investment Committee to ensure consistency of performance from one portfolio to another. The service is available on the Abrdn, Aegon, Aviva, Fidelity, James Hay, M&G Wealth, Quilter and Transact platforms.

Investment objective

To build capital in real (inflation-adjusted) terms over the medium to longer term. Investors should expect a high correlation to stock market behaviour and rewards, including significant fluctuations in value, with only moderate protection in times of market weakness.

Risk profile

The strategy is managed in accordance with Dynamic Planner risk profile 6, with the strategy's expected volatility targeted to stay within the assigned Dynamic Planner risk profile's boundaries.

Headline positioning

- The strategies remain at the upper end of their corresponding Dynamic Planner risk profiles with good exposure to those parts of the world less likely to be exposed to the economic fall-out from war in Ukraine.
- We have reduced or removed entirely our exposure to Europe and increased our allocation to Asia-Pacific ex Japan, where fundamentals and valuations look fairly attractive, and policy is more supportive for risk assets.
- In our lower risk strategies, we continue to allocate to inflation-linked bond funds, actively managed strategic bond funds and 'market neutral' alternative investments, which continue to act as good portfolio stabilisers, diversifiers of risk and sources of return.
- Cash exposure remains low and there continues to be focus on high levels of liquidity in everything that we own.
